

A One-Day Workshop for Secondary Physical Educators

Teaching Games for Understanding

Achieving Specific Educational Outcomes with TGfU

- How to start
- How to implement
- How to assess

As the decade comes to an end, physical educators must work to advance the profession and to explore ways to make our various movement and sport programs lively, effective and engaging. Our search should focus on specific educational outcomes in sport and game education – outcomes that focus sharply on the personal, physical, intellectual, social and spiritual growth of our students. This workshop will examine the ways in which Teaching Games for Understanding (TGfU) facilitates such a focus. Presenters will offer input on how we can get started and how we can implement and assess the approach in our school programs.

Recommended Textbook

Teaching Sport Concepts and Skills:

A Tactical Games Approach (2006).

By Stephen Mitchell, Judith Oslin, Linda Griffin

Interact with Leading Instructors

Dr. Joy Butler
