ESL Plan B

This use to be one of the extra activities (Plan B) that I would use to fill-in on a lesson that went faster than I predicted.

On the reverse of this page is a simple HOBBIES template that works for all ages. For instance I am working with adult English Foundations 1 and 2.

What I discovered is it is useful at the beginning of the program to establish some common themes that the whole class can enjoy. Currently lessons and examples based on gardening and cooking are the greatest interest. Returning frequently to their favourite subject keeps my students attention. Hope it helps you.

Once I had established my class's interest, I use the following extensions:

Cooking

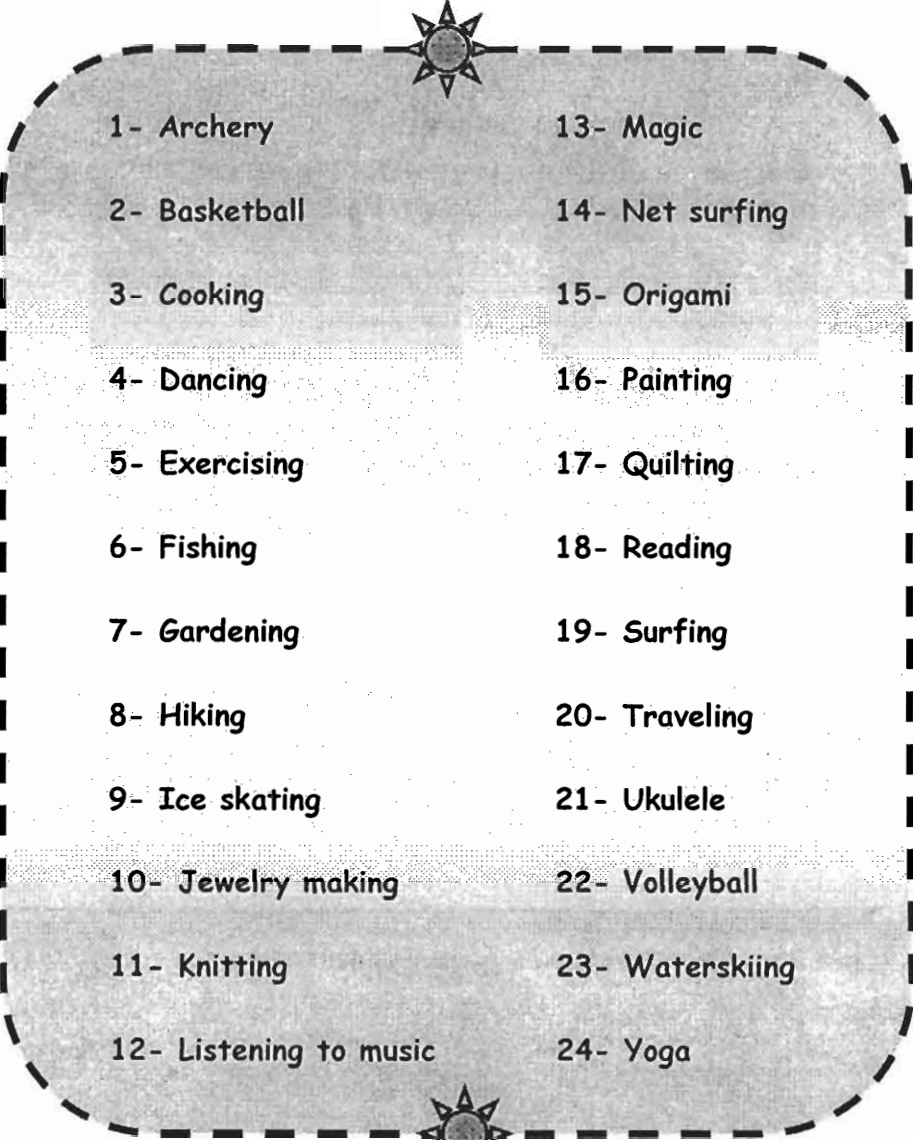

- Writing a grocery list.
- Reading a simple recipe.
- Talking about tonight's dinner.

Gardening

- Show and tell a favourite gardening tool.
- Talk about what is happening in the garden right now.
- Read weather reports to plan our gardening activities.

H O B B I E S:

- write the number next to the right picture -
