

## How to Disable Warning Message to Display Mixed Content

In IE 7, and IE8, when navigating to a web page that contains both secured and un-secured (mixed) content, a security warning will display. This warning message will appear every time a user load a web page with mixed content.

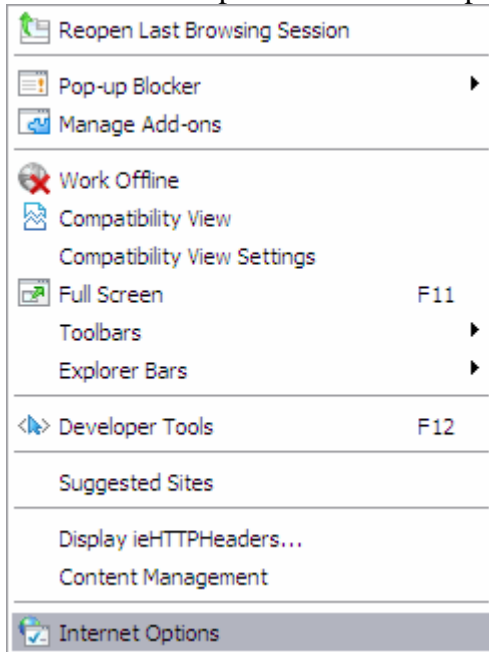

**IE 8 warning message.  
Click on No to proceed.**

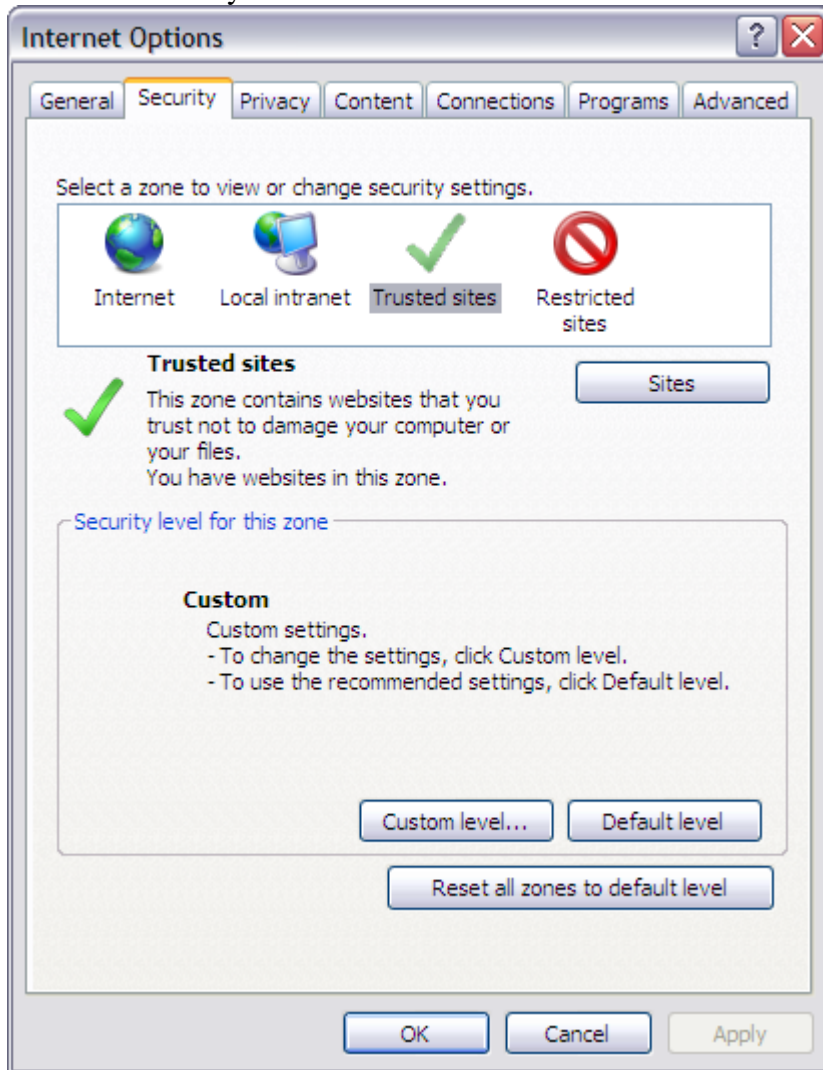

**Warning Message from IE 7  
Click Yes to proceed.**

## To disable this warning message for trusted website(s):

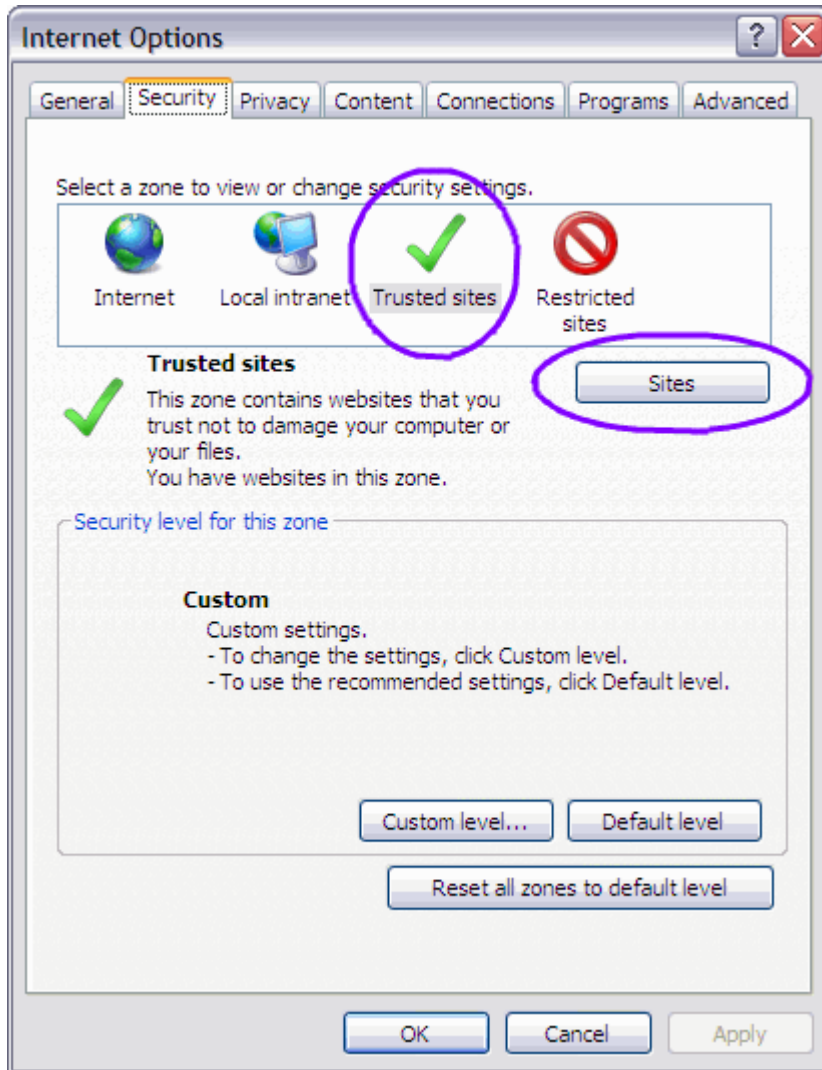

1. In IE click on Tools 
2. Select Internet Options from the dropdown list

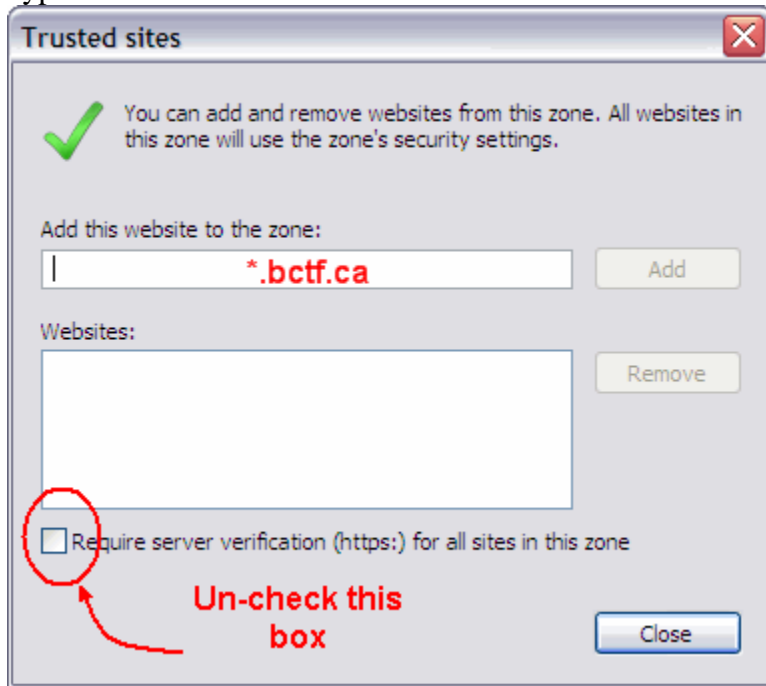

3. Select the Security tab

4. Select Trusted sites and click on Sites button

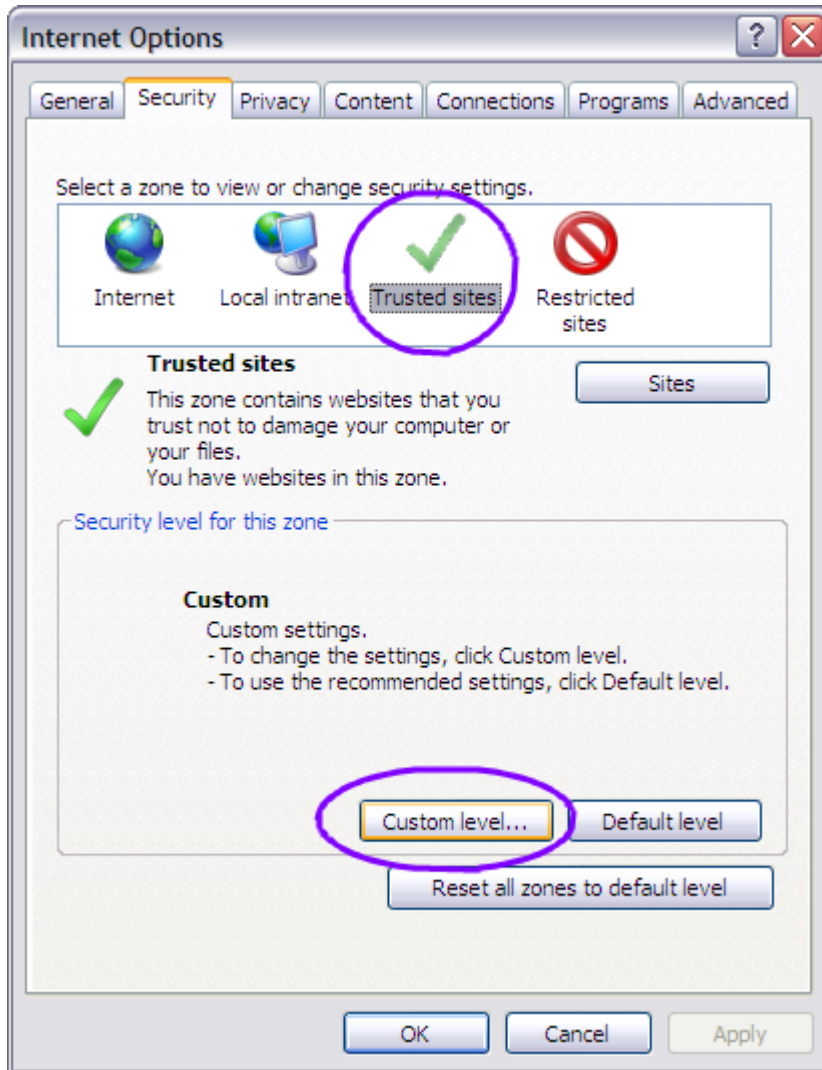

5. Type \*.bctf.ca and click on Add

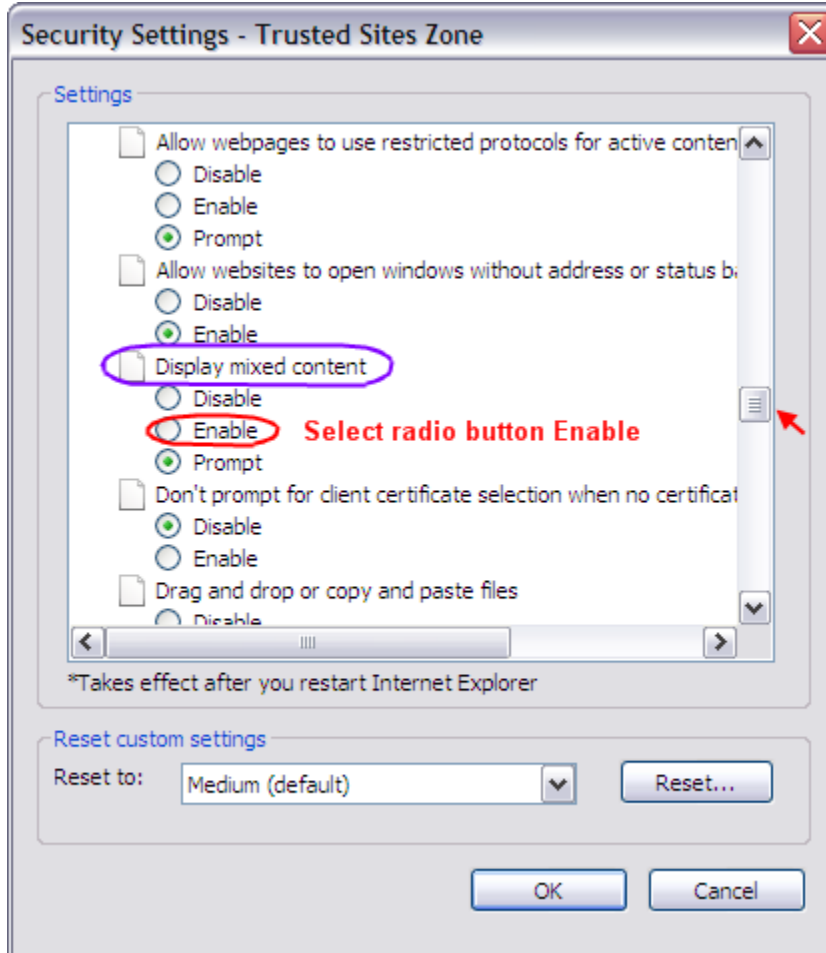

6. When the website has been added, Click Close

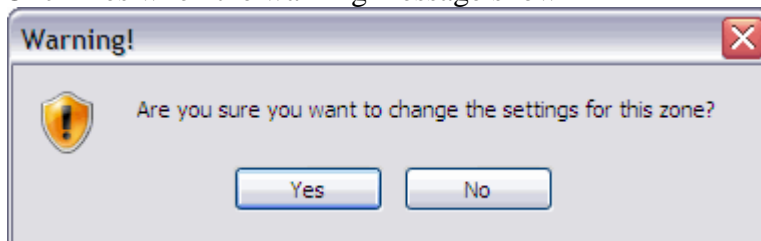

7. Select Trusted Sites and click on Custom Level...

8. Scroll down to below half way in the Miscellaneous section, and set option for Display mixed content to Enable

9. Click on OK.
10. Click Yes when the warning message show

11. Click OK in the Internet Options window
